ABOUT ISAPS

Founded in 1970, the International Society of Aesthetic Plastic Surgery (ISAPS) is the world's leading professional body for board-certified aesthetic plastic surgeons.

Regarded as the leading global authority on aesthetic and cosmetic surgery, ISAPS' threefold mission is to offer Aesthetic Education Worldwide®, to provide accurate information to the public and to promote patient safety.

ISAPS membership includes the world's best and most respected reconstructive and aesthetic plastic surgeons in over 117 locations. Through its rigorous membership requirements, ISAPS plastic surgeons are considered to be among the most qualified surgeons in their respective locations. Furthermore, ISAPS has become the gold standard for providing continuing aesthetic education to its members, providing training, and sponsoring scientific meetings around the world.

A full list of ISAPS plastic surgeons can be found online at www.isaps.org.

2026 ISAPS INTERNATIONAL SURVEY ON AESTHETIC/COSMETIC PROCEDURES PERFORMED IN 2025

Survey participants completed a questionnaire that focused primarily on the number of specific surgical and non-surgical procedures performed in 2025, along with a few ancillary questions related to surgeon demographics and the prevalence of medical tourism.

The International Society of Aesthetic Plastic Surgery (ISAPS) issued an invitation to participate in the study to approximately 17,000 plastic surgeons whose contact information is housed in its proprietary database. In addition, national societies were asked to encourage their members and constituents to take part in the survey. Data from 2,900 plastic surgeons were submitted or provided for the 2025 statistics. To increase accessibility and encourage broader participation, the survey was made available in four languages: English, Spanish, Chinese and Japanese.

This year's number of respondents (2,900) is comparable to that experienced last year (2,975). Additionally, 51 locations are reported individually this year, compared with 32 in last year's report. The broader base of extrapolations for individual locations has influenced some worldwide procedure totals. Furthermore, several new procedures were added to this year's form, which may affect comparability with totals of prior years. When reporting percentage changes from prior years, comparisons are limited to procedures that were consistent across years.

Final figures have been projected to reflect international statistics and are based exclusively on the estimated number of plastic surgeons actively practicing in each location and the respondent sample. This international survey focuses on physicians who are board-certified (or the national equivalent) plastic surgeons. An effort was again made to determine the proportion of plastic surgeons who primarily engage in aesthetic procedures rather than reconstructive work. This analysis has found that approximately 80% of plastic surgeons worldwide focus on aesthetic procedures.

The global estimated number of plastic surgeons counts for 98% of the estimated 60,400 plastic surgeons worldwide. In cases where a national society or National Secretary did not supply an

updated figure, a simple regression model was used to estimate the number of plastic surgeons in that location based on its population size and Gross Domestic Product. In select cases, National Secretary-reported data differed significantly from prior-year submissions. Industry Insights, Inc. and ISAPS reviewed these cases individually and, where appropriate, adjusted the treatment of certain location-specific data to support more meaningful year-over-year comparisons.

The Aesthetic Society, in collaboration with CosmetAssure, once again provided valuable support by permitting the use of its national dataset. This contribution includes detailed statistics from more than 700 US-based surgeons. We appreciate The Aesthetic Society's continued partnership in advancing this global research effort.

As with many studies of this type, outlying responses were addressed. While such values may be legitimate, they can distort averages that serve as the basis for projected estimates. To preserve the reliability of extrapolated results, significant outliers in this survey were adjusted accordingly. Additional standard data editing procedures were also followed to ensure responses aligned with survey guidelines. All reported values have been analyzed for statistical reliability.

Specific data are only shown for locations that provided a sufficient number of responses for the results to be considered statistically valid. Other than standard data editing procedures, no material adjustments were made to these figures. The International Survey on Aesthetic/Cosmetic Procedures Performed in 2025 was compiled, tabulated and analyzed by Industry Insights, Inc. (www.industryinsights.com), an independent research firm based in Columbus, OH, US. The survey was led by Scott Hackworth, a CPA and data scientist who – along with his firm – has conducted research on trends in aesthetic plastic surgery for more than 30 years.

HIGHLIGHTS

OF THE INTERNATIONAL SURVEY ON
AESTHETIC/COSMETIC PROCEDURES
PERFORMED IN
2025

2025 STATISTICS AT A GLANCE

Top 5 surgical procedures worldwide

absolute numbers and changes compared to 2024

1. Eyelid Surgery	2,457,677 procedures	16.2%
2. Liposuction	1,849,828 procedures	-11.4%
3. Breast Augmentation	1,622,639 procedures	-2.2%
4. Breast Lift	1,143,862 procedures	48.1%
5. Abdominoplasty	1,039,808 procedures	0.3%

Top 5 non-surgical procedures worldwide

absolute numbers and changes compared to 2024

1. Botulinum Toxin	7,333,647 procedures	-7.0%
2. Hyaluronic Acid	4,737,957 procedures	-25.2%
3. Non-Surgical Skin Tightening	1,528,552 procedures	23.3%
4. Hair Removal	1,150,365 procedures	-22.6%
5. Chemical Peel	659,942 procedures	-19.5%

Top 5 surgical procedures for women

1. Eyelid Surgery	1,909,270 procedures
2. Breast Augmentation	1,622,639 procedures
3. Liposuction	1,611,993 procedures
4. Breast Lift	1,143,862 procedures
5. Abdominoplasty	933,017 procedures

Top 5 non-surgical procedures for women

1. Botulinum Toxin	6,205,393 procedures
2. Hyaluronic Acid	4,142,775 procedures
3. Non-Surgical Skin Tightening	1,299,639 procedures
4. Hair Removal	962,001 procedures
5. Chemical Peel	544,163 procedures

Top 5 surgical procedures for men

1. Eyelid Surgery	548,407 procedures
2. Gynecomastia	282,954 procedures
3. Rhinoplasty	247,477 procedures
4. Liposuction	237,835 procedures
5. Scar Revision	188,691 procedures

Top 5 non-surgical procedures for men

1. Botulinum Toxin	1,128,253 procedures
2. Hyaluronic Acid	595,181 procedures
3. Non-Surgical Skin Tightening	228,914 procedures
4. Hair Removal	188,364 procedures
5. Chemical Peel	115,779 procedures

OTHER PROCEDURE STATISTICS

What percentage of eyelid surgeries were "Asian Eyelid Surgeries" (all kinds, double folds, epicanthus correction)?		
MEDIAN		0.0%
AVERAGE		15.7%
What percentage of breast implant removals included fat grafting augmentation (conversion)?		
MEDIAN		1.0%
AVERAGE		14.9%
What percentage of breast augmentation surgeries were hybrid (implant and fat)?		
MEDIAN		3.0%
AVERAGE		12.8%
What percentage of breast lift surgeries (mastopexy) were hybrid (implant and fat)?		
MEDIAN		2.0%
AVERAGE		14.1%
What percentage of secondary breast surgery involved:		
An implant exchange		57.9%
An implant inside (not exchanged)		13.8%
No implant inside		28.4%

What percentage of phalloplasty involved:		
Fat grafting		61.7%
Hyaluronic acid		26.6%
Synthetic tissue		11.7%
Number of patients per surgeon undergoing 'Mommy Makeover' and other combined procedures?		
MEDIAN		5.0
AVERAGE		20.0
What percentage of your non-surgical skin-tightening procedures included thread lifts?		
MEDIAN		0.0%
AVERAGE		11.2%
Did you use any biostimulator products in your non-surgical procedures?		
YES		42.1%
NO		57.9%
