Description of Program:	The time spent in this observership will be dedicated to teaching the participants the subspecialty of body contouring after massive weight loss which will include the workup, patient selection, coordination and prioritization of different body contouring procedures, the surgical details and the postoperative care of these complex patients. The participants will also be exposed to a very busy practice in rhinoplasty and septorhinoplasty, in an extensive manner. A variety of other aesthetic procedures will also be available for the participants to learn from.
