Personal Statement: I am a plastic surgeon dedicated to cosmetic surgery for 22 years. I completed my residency in Rio de Janeiro in 1997 with experts who supported me in my professional training. I have been working in private practice since then and I have performed more than 6,000 surgeries of which 80% have been aesthetic. I have worked in the most important clinics in Medellin, Colombia and more recently in Quirofanos El Tesoro where we have 9 surgery rooms, 20 plastic surgeons, and more than 400 plastic surgeries are performed per month. Colombia has been gaining more and more prestige within the cities with the best quality of life in Latin America and Medellín has recently become an epicenter. My most frequent surgeries are breast, buttocks and abdominal contour.

My greatest strength is my love for what I do and the desire to convey to new surgeons all my experience in the development of the professional exercise of plastic surgery, not only in technical but ethical aspects, to know details about the implementation of administration and marketing tools that allow one to practice the profession in an integral way. More information? See my web page and social network.
