MC #4 May 9, 2020
Brow Aesthetic and Face Rejuvenation

MC #5 May 16, 2020
Postbariatric Surgery

MC #6 May 23, 2020
Breast Reduction and Mastopexy

MC #7 May 30, 2020
Gluteal Augmentation

Executive Summary

Further to its launch in April, with three free webinars attracting more than 8,000 delegates, ISAPS Masterclass series continued successful with four masterclasses in May. These were offered free to members to attend and at a \$50 fee to non-members. A new registration portal was created in the X-CD membership system to manage member restricted access.

Since three quarters of the free masterclass delegates indicated that they were not current ISAPS members this group has remained a focus for proactive marketing of ISAPS membership opportunities. A 'pending applicants' status allows those who apply to view the webinar series immediately to further incentivize new memberships. Although we are not able to accurately track these conversions it appears that approximately 30 members joined with this pending status during the first three webinars, and we have had the highest number of new members joining us between March and end of May.

This report summarizes attendance and evaluations for the May masterclasses, with comparatives given for April where possible. There were an average of 800 registrants per session (Fig 1) and although member registrations are lower through the new registration process, there is improved engagement with most registrants now going on to access the events live and average live viewing time increased from 60 to 65 minutes. The audience continues to be truly international and spread across all regions (fig 2, appendix 3), with highest attendance still from Europe but notably higher attendance from the middle East / Africa than previously. The top attending countries are shown for each webinar and USA, Mexico, Italy and Brazil remain consistently in the top 5.

Delegate evaluations feedback (Appendix 1) continues to be very positive with 96% of delegates stating that their expectations had been met or exceeded. More than 96% overall rating the series as good or excellent (reaching 99% for MC5). 99% said they would attend another similar event in future, and 98% that they would recommend the Masterclasses. Looking at the ratings for individual speaker presentations, 95% of delegates rated the talks as good or very good overall. The streaming services continued to be rated as good or very good by more than 90% of delegates (91%-98%), and the registrations process also, with a dip to 83% for the first masterclass in May when the system changed.

General engagement followed our experience of previous webinars (appendix 2) where Instagram remains ISAPS most active platform with over 60,000 impressions for the last two webinars, and 1,569 new followers during May. We have noted that click throughs from video advertising has been reducing which may be a result of increased familiarity, or an overload in material, so we continue to monitor this.

The Masterclasses were intended as a free resource to members and have been planned and delivered in a short time frame in response to the lack of live events during COVID-19 and as such continue to be well received. Quality has been prioritized and our evaluations suggest this has been achieved. Looking at the retrospective costs to deliver the masterclasses, and the modest income now arising from non-member attendance in May, the webinars are currently operating at a net loss to ISAPS, however we hope for longer term gains in member numbers through this increased engagement. We will continue to evaluate and report in more detail on this for future decision making.

ISAPS continues to receive generous support from its contributors (pg 16) to deliver these webinars at short notice and many thanks are due to them for their time, energy and excellent presentations.

Testimonials & Comments

May 9 | Data as of May 15 | Full survey results: <https://de.surveymonkey.com/results/SM-XGJMRD2N7/>

General Testimonials
It is always a pleasure to watch Dr. Marten. Educative, precise, accurate, to the point. Extremely useful information, presented in a simple way, understandable by young surgeons.
Content comments & Improvements
Good webinar but I even would like to see more surgical tips
Excellent presentation, would be helpful to allow more time for the excellent questions from attendees

May 16 | Data as of May 22 | Full survey results: <https://www.surveymonkey.com/results/SM-FDMMD5NN7/>

General Testimonials
This was well done with excellent presentations by Drs. Roxo and Rubin. What was especially important were the videos combined with the explanation of technique. Excellent postop results.
Content comments & Improvements
It is better to cover one topic in details than 2 topics at the same time. Thank you for yours efforts .
Very good. If possible, add the option of include automatically to our personal calendar.

May 23 | Data as of May 29 | Full survey results: <https://www.surveymonkey.com/results/SM-MMTY6B5N7/>

General Testimonials
Excellent teaching platform with high quality speakers and content. This is so good that I suspect we will all travel less in the post covid world without limiting our ongoing education.
The speakers are masters in their field. Their expertise, their experience and their humility while sharing it was exemplary and note-worthy.
Content comments & Improvements
I would like an easier logging in
I am a resident doctor, and not very experienced it would be fair if the masters firstly explain basic things basic principles and then their own experiences and tricks. But they mostly start from own experiences and some tricks which doesn't help a lot to a not very experienced surgeon who doesn't rule over the basics
It would be better if one participating can ask questions directly to the speaker

May 30 | Data as of June 4 | Full survey results: <https://www.surveymonkey.com/results/SM-FBJLNBDF7/>

General Testimonials
100% outstanding, may be the best webinar in 2 months of quarantine
Very informative & to the point & I also appreciated the tips and tricks. Looking forward to more such webinars!
Content comments & Improvements
Ask the expositors to respect the timing and really talk about the subject on question. (That has been given or chosen). Stop the "this is how I do it"- topic
The Master Class Webinars since the pandemic are so good but much less details. If possible there should be more Live Surgery as before The pandemic because every surgeons find longer time to watch the webinar. Thanks and Stay Safe.
